

# Preventing Violent Extremism through Rehabilitation, Vocational Training and Social Reintegration in Children's Statutory Institutions in Kenya (Phase 2)

**Project Number:** CTCBP- P009559  
**Country:** Kenya

**Reporting Period:** 4 December 2020  
to 31 December 2021  
**Date of Report:** 31 December 2021

## Preventing Violent Extremism through Rehabilitation, Vocational Training and Social Reintegration in Children's Statutory Institutions in Kenya (Phase 2)

**Project Number:** CTCBP- P009559

**Country:** Kenya

**Reporting Period:** 4 December 2020 to 31 December 2021

**Date of Report:** 31 December 2021

## Tombstone Data

Implementer's Name and Contact Information

**Name:** Mrs. Charity Kagwi-Ndungu

**Title:** Head of ROEA Crime Prevention and Criminal Justice Programme

**Email:** charity.kagwi@un.org

**Cell Phone:** +254 705 859514

**Total Project Budget:** CAD\$2,544,639.21

**Project Start and End Date:** 4 December 2020 to 31 March 2024

**Canada**

This project is supported by the  
Government of Canada through  
Global Affairs Canada

## 1. Outcomes Achieved – Progress on or towards the Expected Outcomes

Progress on or towards the Ultimate Outcome 1000<sup>1</sup>

**1000 Ultimate Outcome: Reduced recidivism and radicalization to violent extremism hence improved safety and security**

**Indicator:** Reduced rate of recidivism among Children and Youth

According to the Kenya National Bureau of Statistics, Economic Survey (Republic of Kenya, 2021: 323), there was a general decline in most of the cases reported to the police with an exception of offences under morality, murder and corruption. The total number of crimes reported declined by 25.4 per cent from 93,411 in 2019 to 69,645 in 2020. The number of crimes reported to the police involving other offences against persons decreased by 29.1 per cent in 2020 and accounted for 27.7 per cent of all reported crimes. Cases involving stealing, went down by 37.6 per cent from 13,954 in 2019 to 8,709 in 2020. There was a slight increase in reported cases of offences against morality by 13.7 per cent from 8,051 in 2019 to 9,153 in 2020. All these offences could be attributed to the COVID-19 pandemic containment measures such as restriction of movement and curfews that led to the reduction of crimes committed as well as crime reporting to the police. In addition, homicide offences increased by 4.7 per cent from 2,971 in 2019 to 3,111 in 2020.

Additionally, due to the COVID-19 pandemic, the Government reviewed cases of remandees to alternative non-custodial sentencing, providing affordable bails, and re-trials to avoid congestion which led to decrease in the number of both convicted and un-convicted offenders. Furthermore, prisons and rehabilitation schools were not admitting offenders for about seven months as alternative dispute resolution where applicable was encouraged.

According to the Kenya National Bureau of Statistics, Economic Survey (Republic of Kenya, 2021: 347), There was a general decrease in the number of child protection cases reported, from 175,087 in 2019 to 146,881 in 2020. This was partly attributed to the work-from-home directive that led to the closure of Government offices for the most part of the period under review. Cases of vulnerable children decreased by 37.2 per cent from 9,064 in 2019 to 5,694 in 2020 while those of children in need of registration decreased from 1,955 in 2019 to 1,076 in 2020. Similarly, cases related to Violence Against Children (VAC) declined by 11.2 per cent in the period under review. There were, however, significant rise in cases of child labour (55.4%) and child pregnancy (52.7%) in the same period. Cases of FGM rose to 139 in 2020 from 74 in 2019, while gender-based violence in terms of physical abuse recorded 3,884 cases in 2020 from 2,189 in 2019. Additionally, cases related to sick children increased to 74 in 2020 from 34 cases in 2019 while cases of internally displaced children increased to 205 in 2020 from 67 in 2019.

<sup>1</sup> For the definition of “progress on” and “progress towards” please Global Affairs Canada Results-Based Management for International Assistance: A How-To Guide, page 86-87, or Global Affairs Canada Glossary of Results-Based Management Terms.)

According to the Kenya National Bureau of Statistics, Economic Survey (Republic of Kenya, 2021: 336). Convicted prison population decreased by 62.1 per cent from 77,347 in 2019 to 29,306 in 2020. The prison population comprised of the youth aged 25 years and below and accounted for 43.8 per cent of the total prison population. There was a decrease among convicted prisoners among all age cohorts due to the changes implemented as a result of COVID-19. The number of convicted child prisoners (under 18 years) decreased by 73.0 per cent from 1,285 in 2019 to 347 in 2020. Similarly, the number of young-adult-prisoners of college age (18-25 years) decreased by 62.9 per cent from 33,684 in 2019 to 12,487 in 2020 while those aged 26 years and above decreased by 61.1 per cent from 42,378 to 16,472 inmates over the same period.

## 1100 Intermediate Outcome: Successful rehabilitation and reintegration of youth and women ex-offenders through a holistic approach, and a comprehensive follow up mechanism after exit with the aim of reducing recidivism and violent extremism among youth and children.

**Indicator:** Number of ex-offenders successfully rehabilitated and reintegrated through this project.

**Baseline:** 6 girls rehabilitated back to the community through primary and secondary education

**Target:** 15 child offenders

Overall, **150** children (**109** boys and **41** girls) from the six rehabilitation schools, namely; Kabete, Kirigiti, Kakakamega, Likoni, Wamumu and Dagoretti were reintegrated back to the community during the reporting period. Upon release from the rehabilitation schools due to expiry of their committal warrants, some children were placed back to formal education, some went to work as apprentices to gain practical skills in their respective areas of vocational training while others joined businesses of different kinds. For example, one youth (who exited after reaching 18 years of age) took over running family business of transporting rice from farmers to millers using their donkey and hand cart. It is anticipated that some of the children who will exit rehabilitation school in 2022, will venture into poultry family demonstrated by the interest in this agricultural field. Of the total children who exited, 23 Children, 13 boys and 10 girls were successfully reintegrated back to the community through formal education. This was made possible through two private sector partners: Airtel and Fine Tech, Mirai Kenya which is an NGO, Individuals and two academic institutions (Liberty Girls' and St. Patrick's Boys' Secondary Schools). The continuous follow-up of these children by UNODC and the Directorate of Children Services (DCS) Officers on the ground has helped the children not to revert to criminal activities. Only one girl of the six who had been reintegrated during Phase I, stopped schooling and got married despite efforts made in counselling her.

**Variance, if any:** The target set for the project was to rehabilitate 15 ex-rehabilitation school children because of the difficulty faced in getting a sponsor to support the children and the stigmatization that they face within the community. However, the project has managed to surpass the target by eight children.

**Corrective actions, if necessary:** The corrective measures the project team has taken to prevent re-offending are to keep the children occupied in school through extracurricular activities offered by the school, continuous counselling of the children, and providing a holiday home and extra tuition during holidays for those whose home environment is not conducive for their development. Besides, the government in collaboration with partners have programmes aimed at linking children exiting the rehabilitation schools to successful and top brand entrepreneurs such as lead fashion designers, entertainment industry and motor vehicle mechanics. Recommended for inclusion into the programme is creation of talent hubs to harness various talents the children may have and support them to excel in various talent areas such as; music, dance, football, technological gadgets repair (phones, tablets, computers).

## TWO STORIES OF CHANGE

1. Deradicalized and disengaged: A boy, named AK aged 16 years old was admitted to Form One in January 2019 but ended up in bad company. He began to take drugs which worsened his behaviour and subsequently, he got involved in criminal activities. In his bad company, they caused untold havoc to their community. Eventually, he became radicalized based on religious teachings and persuasion that promoted violence. In November 2019, his parents and the community handed him over to the criminal justice system due to the high insecurity and violence he had caused in the community. He was processed through the justice system and he eventually was committed to Wamumu Boys Rehabilitation School in 2020. Wamumu is a high-risk rehabilitation school for boys. In January 2021, the boy had demonstrated change in his behaviour and attitude and had a lot of potential to continue with his education. As the children who had completed 2020 KCPE in March 2021 were being assessed for transition to mainstream school by UNODC, the Wamumu rehabilitation manager recommended the boy for diversion through education since he had already shown great progress in behaviour change and attitude because of the psychosocial support provided to him. The boy had also requested to be taken back to school. Ever since he joined school in August 2021, he has maintained steady grades not going below a B+ and has been well disciplined throughout the last two terms. He has become a member of justice club and a peer educator to the other students. Psychosocial and education support provided to the boy has helped disengage him from violent beliefs and bad company he had acquired as well as reintegrate successfully with his family.

2. Crime Prevention: A family group discussion conducted for the 26 parents/guardians had a great impact on their attitude and behaviour. It also helped parents/guardians understand the role they play in moulding their children's behaviour and attitude. As a result of the discussions above, the parents formed three regional support groups each headed by a chairperson, namely:

- ▶ Mashujaa Group covering parents from Central Kenya, Eastern Kenya and Central Rift Valley and whose chairperson is a female.
- ▶ Pwani Support Group covering parents from Mombasa to Lamu counties and whose Chairperson is a male.
- ▶ Nyanza Support Group covering parents from Western and Nyanza regions including South rift Valley and whose chairperson is a male.

The support groups are expected to be reporting every three months starting February 2022 on their progress and any meetings or activities they carry out. Objectives of the support groups are:

- ▶ To offer each other support when they come across a situation that they cannot handle alone and require moral support to overcome.
- ▶ To act as community educators in issues concerning child delinquency and child protection, having gained some experience, learnt some skills, and increased their knowledge on child matters and crime prevention.
- ▶ To ensure no child is left behind, through offering psychosocial support to the children that come from their region but have never been visited.
- ▶ To work with the children officers in their regions to identify children at risk, as well as refer parents of children at risk to where they can get help before the child gets into the child justice system.

**1110 Immediate Outcome: Capacity of child/young offenders and women offenders' life skills, vocational training, entrepreneurship skills, financial literacy, and emotional well-being enhanced.**

The Assessment Report on Rehabilitation and Social Reintegration Programmes Services and Practices for Children in Conflict with the Law in Kenya and the Blueprint for Rehabilitation and Social Reintegration Programmes for Children in Conflict with the law in Kenya were validated on 14 and 15 April 2021 respectively and published. The disaggregated participation of participants to the virtual workshop was 42 male, 47 female and 8 children. The two publications were officially launched on 28 April 2021 by the Chief Administrative Secretary for the Ministry of Labour and Social Protection in a virtual event with the aim of making the publications available for public use and for implementation of its recommendations by stakeholders within the criminal justice system. The event was attended by the stakeholders within the criminal justice system and development partners. There were 95 participants in attendance, 36 male, 47 female and 12 children.

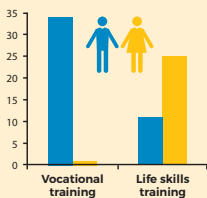

Senior Government Officials who presided over the launch

The published Assessment Report provides findings and recommendation on rehabilitation and reintegration programmes for children in conflict with the law aimed at informing DCS strategic planning and enhance the effectiveness of the programmes offered by DCS and other stakeholders. The published Blueprint which was informed by the findings of the assessment, provides a framework within which rehabilitation and reintegration programmes should be implemented in each institution within the child justice system; highlights the principles that should inform processes at each stage of the child justice system; and sets out requirements for each programme to run optimally, in line with the overall objective of rehabilitation and reintegration.

**Indicator:** Number of offenders trained on vocational skills and life skills

**Baseline:** 40 girls trained on life skills

**Target:** 120 including girls and boys

On vocational training, **35** children (**34** male and **1** female) completed their trade tests.

**36** children (**11** boys and **25** girls) from Kabete Boys and Kirigiti Girls Rehabilitation Schools completed their life skills training successfully.

**Output: Offenders in the rehabilitation schools / correctional facilities are equipped with life skills and basic employability skills in accordance with their needs as well as their behaviour positively modified**

**Indicator:** Number of offenders trained on vocational skills, life skills and received counselling

Vocational Training: Among children who were undertaking vocational training in 2021, 35 children (34 male and 1 female) completed their trade tests. 30 are still in the institutions and 5 have exited. Wamumu Rehabilitation School has 16 boys and Dagoretti Rehabilitation School has 1 girl who are still within the institutions. Kabete Rehabilitation School has 9 boys in the institution and 1 boy who has exited. Likoni Rehabilitation School has 8 boys who completed the trade tests and 4 of them are still in the institution while the other 4 have exited. Kakamega and Kirigiti Rehabilitation Schools did not have any candidates who sat for the Trade tests in 2021.

Trade	Wamumu	Kabete	Likoni	Dagoretti	Total
Automotive	4	2	0	0	6
Masonry	9	1	8	0	18
Electrical and wiring	0	5	0	0	5
Carpentry	0	2	0	0	2
Dressmaking and tailoring	0	0	0	1	1
Painting and decoration	3	0	0	0	3
<b>Total</b>	<b>16</b>	<b>10</b>	<b>8</b>	<b>1</b>	<b>35</b>

Children who were trained in life skills on their graduation day

Life Skills: 36 children (11 boys and 25 girls) from Kabete Boys and Kirigiti Girls Rehabilitation schools respectively, underwent the Life skills training from 25 October to 25 November 2021 which culminated in a colourful graduation on 26 November 2021. Behaviour change was evident through the psychosocial support provided as children were able to reach out to and reconcile with their parents. There was improved discipline in the respective institutions as children began the road to recovery from various levels and types of traumas. From the lessons learned, the girls made their own rules for cohesive and harmonious living while in the school.

Family Group Discussions: The life skills training for the 36 children was also complemented with a family group discussion. 26 parents (9 male and 17 female) attended a two-day family group discussion that was held on 8 and 9 November 2021. The discussion was aimed at giving the parents and guardians a picture of the child justice processes and their effects on the child as well as the opportunities for rehabilitation and behaviour change. It was also a time for reconciliation and new beginnings for both parents or guardians and children. As a result of this family group discussion, the parents formed three regional support groups,

namely; Mashujaa, Pwani and Nyanza, with each group headed by a chairperson. The support groups are expected to be reporting every 3 months starting February 2022, on their progress and any meetings or activities they carry out.

21 candidates of those expected to sit for 2021 Kenya Certificate of Primary Education (KCPE) and who did not undergo the life skills training, individual assessments and family conferencing where necessary, will commence in January 2022. Out of this group four of them have already been exited but two will be returning to do their KCPE in March 2022. The purpose of this assessment will be to ascertain whether they want to continue to mainstream school or transition to Technical and Vocational Education and Training (TVET). It will also establish what support structures the child has in the community in which they will be returning to after sitting for their KCPE.

Parents during family group

**Variance, if any:** Target for the project was to have 120 children trained on vocational training and life skills by end of the project. During 2021, a total of 71 children have benefitted in either of vocational training or life skills. We expect to meet the target by the end of the project.

**Corrective actions, if necessary:** The project team including DCS will continue appealing to partners for support as well as parents or guardians, especially in the area of psychosocial support to change the behaviour and attitude of these children which is core to their development and resilience.

**Indicator:** Number of equipment provided, and offenders trained using the purchased equipment

**Vocational Training Equipment:** The equipment to strengthen the vocational training workshops for Electrical and Wiring, Tailoring and Dressmaking, Masonry, Carpentry, Poultry, Bakery and Confectionery, and Automotive; and equip children with skills in their areas of interest was procured and officially handed over to DCS on 10 November 2021. The skills learned will enable the children earn a living and be economically empowered in a bid to smoothen the reintegration process. For the number and type of equipment provided, please see Annex I.

Tailoring and dressmaking equipment during the launch

**Vocational Training:** During this reporting period, 192 children (136 boys and 56 girls) from the target six rehabilitation schools are undertaking vocational training courses. The number is projected to rise owing to the relaxing of covid-19 pandemic containment measures that saw institutions restrict the number of children committed therein. DCS is continuing with the process of ensuring additional instructors are brought on board and it has completed the internal rationalization of staff and training these staff is on-going.

Poultry in Kabete Rehabilitation School

**Variance, if any:** There is no variation.

**Corrective actions, if necessary:** DCS will ensure sustainability of the vocational training by strengthening safe and security measures at the institutions to ensure the equipment is not stolen. It will also ensure the institutions have qualified trainers and their working environment conducive to sustain them.

**Indicator:** Number of children and adolescents participating in creative and expressive psychosocial activities (including peer and support groups)

**Indicator:** Number of sessions held to offer psychoeducation (e.g., on child development and wellbeing, stress responses and coping for children and parents/guardians)

UNODC in consultation with DCS, began the process of contracting a suitable entity to provide mental health and psychosocial support services (MHPSS) to the six rehabilitation schools as an important approach to supporting children and their families affected by adverse environments and to reduce the risk of violence associated to them. This support will cover the children in the within the target six rehabilitation schools and those exiting from these schools.

**Variance, if any:** The variance in progress arises because of the incomplete contractual process.

**Corrective actions, if necessary:** The project team is following up with the procurement section and vendors to facilitate receipt of feedback.

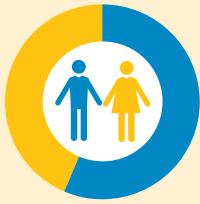

**1120 Immediate Outcome: Ex- rehabilitation schools’ offenders having access to education and employment through established education outreach programs and strategic partnership for opportunities from private sector.**

**Indicator:** Number of ex-offenders linked to education and employment opportunities through established partners

**Baseline:** 6 girls linked to primary and secondary education

**Target:** 15 Offenders

Children who have exited rehabilitation schools and linked to Secondary Education: **23** children, **13** boys and **10** girls were successfully reintegrated back to the community through formal education.

Children who have exited rehabilitation schools and linked to employment: None

**Output: Ex-offenders rehabilitated and reintegrated in the community through education and employment**

**Indicator:** Number of ex-offenders rehabilitated and reintegrated through this project (including children reunified with family members or in other permanent care arrangements)

Children who have exited rehabilitation schools and linked to Secondary Education: 23 children, 13 boys and 10 girls were successfully reintegrated back to the community through formal education. This was made possible through two private sector partners: Airtel and Fine Tech, Mirai Kenya, Individuals and two academic institutions (Liberty Girls’ and St. Patrick’s Boys’ Secondary Schools). These children have shown steady progress in their classwork and are among the well-behaved students as per their respective school principals. UNODC also provided to these children basic needs including educational material

Girls at Liberty Girls Secondary school receiving their basic needs

Boys at St. Patrick’s Boys Secondary school receiving their basic needs

such as reading books. The continuous follow-up of these children by UNODC and the Directorate of Children Services (DCS) Officers on the ground has helped the children not to revert to criminal activities.

34 children, 23 who transitioned to mainstream school from rehabilitation schools and 11 other children received Education for Justice (E4J) training which seeks to prevent crime and promote a culture of lawfulness through education activities designed for primary, secondary and tertiary levels. The other

Children from St Patrick's Boys and Liberty Girls Secondary School during E4J training

students in the school were part of the training to promote inclusivity and integration. 13 teachers, 4 from Liberty and 9 from St Patrick's Secondary schools were also trained. The main outcome of the training was the two justice clubs formed in each partner secondary school. The justice club is composed of students and teachers.

Currently, 44 children, 24 girls and 20 boys in the six target rehabilitation schools are expected to sit for their KCPE in March 2022. 23 of these children (13 girls and 10 boys), already underwent life skills training during the last quarter 2021 and all are within the institutions except one boy who was recently exited but will return to do his KCPE. Therefore, there is dire

need for sponsors who are willing to take these children further in pursuit of their interest either in vocational skills or formal education.

Number of children reunified by family: 133 children were successfully reunified by parents or guardians through continuous counselling for children and parents or guardians. This was made possible by joint efforts between UNODC transition and reintegration expert and the respective managers of the six target rehabilitation schools.

Status	Those exited from rehabilitation school	Those in rehabilitation school
Reunified with parents or relatives/ achieved permanency	111 (91 boys, 20 girls)	22 (7 boys, 15 girls)
Family discussions recommended/ ongoing	59 (46 boys, 13 girls)	12 (3 boys, 9 girls)
In need of Alternative Care/Safe house (At-Risk Children)	37 (32 boys, 5 girls)	1 (girl)
<b>Total</b>	<b>207</b>	<b>35</b>

**Indicator:** Number of empowerment toolkits provided through this project.

None of the children who underwent vocational training and have completed their trade tests have received the empowerment toolkits.

**Variance, if any:** The project is yet to purchase the empowerment tools planned under activity 5. This is envisioned to be done within 2022/2023 fiscal year.

**Corrective actions, if necessary:** DCS and UNODC will work jointly to provide psychosocial support to these children with the aim of ensuring that they are modelled to make and take responsibility of their own decision.

## 1200 Intermediate Outcome: Improved application of international instruments that relate to the rights of children, youth and offenders by practitioners in juvenile justice and staff in Children's Statutory Institutions.

**Indicator:** Number of staff who have applied new skills related to the training on international legal framework/instruments related to the rights of children, youth and offenders in their daily work

**Baseline:** 0

**Target:** 330 Staff in the Children's Statutory institutions

None of the staff have received training planned under this project.

Variance, if any: This is because: (a) the development of the training curriculum and manual on preventing violent extremism is still at its initial stages of development; and (b) the development of modules on the Child Protection Information Management Systems (CPIMS) to be applied in training the staff is yet to start.

Corrective actions, if necessary: DCS has formed a Technical Working Group (TWG) that will work jointly with the consultant in developing the training materials as well as supporting in facilitating the process through the required government procedures. For CPIMS, DCS initiated discussions with Health IT (a USAID funded programme) on the consultant who will work with them to upgrade the CPIMS. The consultant was then contracted for a further three years and hence will be available to support system development activities including development of the system modules for training of staff.

**1210 Immediate Outcome: Increased knowledge and skills of staff from Children's Statutory Institutions in implementing international legal framework/instruments relating to the rights of the child, youth and in general, offenders; and in handling violent extremism cases as well as children with special needs.**

**Indicator:** Increased number of staff with an understanding of international legal framework/instruments relating to the rights of the child, youth and in general, prisoners; and in handling violent extremism cases

**Baseline:** Limited number of staff have an understanding of international legal framework/instruments relating to the rights of the child, youth and in general, prisoners; and in handling violent extremism cases

**Target:** 330 Staff in the Children's Statutory Institutions

None of the staff have received training on preventing violent extremism.

A few staff have received training on CPIMS which was not structured. The structured training will take place once the training materials on CPIMS have been developed.

**Output: Strengthened capacity of staff in managing radicalization and violent extremism in Children's Statutory Institutions in accordance with international instruments through delivery of training and provision of equipment.**

**Indicator:** Number of staff trained

No staff have received training under this project on preventing violent extremism. UNODC has already contracted an expert who will work together with TWG formed by DCS to develop a tailor-made training curriculum and manual for Children Officers on preventing violent extremism and conduct training of trainers. This initiative seeks to build the capacity of children officers in:

- Detecting at early stages the potential candidate or recruit for the violent extremism and crime including management of such cases.
- Preventing and countering the involvement of children and youth in violent extremism and other serious crimes in line with international standards and national legal framework;
- Understanding the level of risk a child or youth offender poses to the child protection personnel, community and the nation, as well as appropriate targets for change through application of appropriate needs/risk assessment tools;
- Identifying effective justice responses, which should include appropriate Child Protection Information Management System (CPIMS) Measures, to children and youth involved in serious crimes, whether they are in contact with the justice system as victims, witnesses or alleged offenders; and
- Identifying appropriate rehabilitation and reintegration programmes for children and youth involved in serious crimes.

**Indicator:** Number of equipment purchased

UNODC has already procured six desktops, six monitors and six laptops to be handed over to the six target rehabilitation schools. However, the official handover to DCS is yet to take place. This equipment will be used to train the children officers in these rehabilitation schools on how to input and manage data in the CPIMS. This is aimed towards successful implementation of child protection and social welfare services which are dependent upon the availability and use of relevant data. This data should provide information on the magnitude of, and any trends evident in, children involved in violent extremism, child protection issues, as well as the impact of programmes and interventions.

**Variance, if any:** Already provided under Intermediate Outcome.

**Corrective actions, if necessary:** Already provided under Intermediate Outcome.

## 1300 Intermediate Outcome: Improved coordination between government and the community in handling cases related to violent extremism, and rehabilitation and reintegration of offenders.

**Indicator:** Number of coordination meeting and consultations held between partners

**Baseline:** 2 meetings supported by UNODC for Juvenile Justice Agencies

**Target:** Quarterly

Four meetings were held with the child justice agencies in 2021.

During UNODC and DCS joint meeting to inspect equipment delivered at Likoni Rehabilitation School, DCS organized for a meeting with stakeholders working in the area of preventing and countering violent extremism on 25 August 2021 at the DCS County Coordinator's Office. The meeting was led by the County Coordinator, Mr. Philip Nzenge. The objective of the meeting was to discuss on how best partners can collaborate to address challenges facing children in the justice system with a particular focus on preventing violent extremism. The participants of the meeting were drawn from the following organizations: Kuza, Mombasa Children's Network, National Legal Aid Service (NLAS), Kituo cha Sheria, Kenya National Commission on Human Rights (KNCHR), Haki Africa and Kenya Community Support Centre. Interventions that had been taken to address some of the mentioned challenges included:

- Plans were underway for UNODC and DCS to jointly develop a tailor-made training curriculum and manual to train children officers on prevention and countering of violent extremism.
- Advocating and promoting human rights approaches in dealing with children with criminal behavior e.g. ensuring their right to access justice
- Partnering to providing psychosocial support e.g. DCS was working towards establishing a counselling mall for children in Mombasa
- Partners had worked together with Mombasa County to revise its action plan to factor in challenges facing children and they had included crime prevention intervention such as sports, culture and music
- Partners were promoting child participation in the development of policies related children matters
- NLAS was collaborating with DCS to provide legal aid in Likoni Remand Home.
- Kituo cha Sheria was supporting DCS to address the problem of street children.
- There were plans to relaunch the Area Advisory Committees within Mombasa County

UNODC and DCS held a meeting with Students Association for Legal Aid and Research; Coordinator of SGBV matters, Dr. Mercy Deche; and Associate Dean Law Faculty and In Charge of legal aid for children in conflict with the law, Dr. Sarah Kinyanjui on 25 August 2021 at the University of Nairobi, Mombasa Campus. The objective of the meeting was to discuss the support the university was providing to Likoni Remand Home and Rehabilitation School.

Through the EU Programme for Legal Aid and Empowerment in Kenya (PLEAD), UNODC supported the National Council on Administration of Justice secretariat including its national task force on Children Matters with two workshops:

- In March 2021 UNODC also supported the Throughcare and Aftercare Procedures Committee under NCAJ to revise the existing outdated Throughcare and Aftercare Procedures to align them with international instruments on child justice and the new changes in the legal framework including the Constitution of Kenya, 2010. The intended objectives of the revised Throughcare and Aftercare Procedures are to: Align the handling and transfer of children in statutory institutions with the law; Enhance inter-agency or multi-agency cooperation to foster effective and efficient handling of child offenders; Standardize admission and exit procedures across criminal justice institutions dealing with children; Streamline procedures and preparations for reintegration of child offenders upon exit from institutions; Institutionalize collection and management of accurate data on children in statutory institutions; and Equip officers to effectively handle children in the criminal justice system from one stage to the other.
- From 1 – 2 December 2021, the NCAJ was supported to bring on board the relevant stakeholders to validate the reviewed Throughcare and Aftercare Procedures before application as provided for in Article 10 on National Values and Principles of Governance and public participation. The Procedures will be published during the first quarter of 2022.

Stakeholders during the validation workshop of the Throughcare and Aftercare Procedures

**Variance, if any:** There is no variation.

**Corrective actions, if necessary:** Under PLEAD, UNODC will support the design, layout and printing of the Throughcare and After Care Procedures as well as support the implementation of the Procedures through trainings of the relevant agencies including DCS.

## 1310 Immediate Outcome: Established partnerships between government and the community in handling violent extremism cases; and in rehabilitation and reintegration of young offenders and children in conflict with the law.

**Indicator:** Number of operational partnerships established

**Baseline:** 3 operational partnerships

**Target:** 4 operational partnerships

Seven operational partnerships are in place with the Private sector (Airtel and Fine Tech), Mirai Kenya, Individuals within the community, Academic institutions (Liberty Girls' and St. Patrick's Boys Secondary Schools, and University of Nairobi) and National Council on Administration of Justice (NCAJ).

**Variance, if any:** The project has attracted three more partners than envisioned.

**Corrective actions, if necessary:** The project team will continue promoting the rights of children in relevant forums to increase support for the vulnerable and children in conflict with the law.

### Output: Partnerships established in the implementation of the identified initiatives for maximum use of resources

**Indicator:** Number of partnerships established

Seven operational partnerships are in place.

Private sector (Airtel and Fine Tech), Mirai Kenya and Individuals within the community supported the school fees of the 23 children who transitioned to mainstream. This is because most of them their parents could not afford paying fees. UNODC provided basic items and reading books for use at school by the children.

Liberty Girls' and St. Patrick's Boys Secondary Schools provided education vacancies for the 23 children who exited the six rehabilitation schools.

University of Nairobi School of Law – Mombasa Campus is partnering with DCS and other stakeholders in Mombasa County to enhance Legal Aid for Children in Conflict with the Law and Legal Assistance for Child Sexual and Gender-Based Violence (SGBV) Victims and SGBV Victims with Disabilities. Likoni Remand Home and Likoni Rehabilitation School which are in Mombasa County are beneficiaries. This initiative of University of Nairobi follows the findings in the launched Assessment Report that there was lack of legal aid for children and that children were unable to effectively participate in court proceedings because of lack of knowledge. Under its partnership with DCS:

- The university sought the services of its alumni specialized in legal profession to support the children through provision of legal aid to the children lacking representation in court. At the time of the identified support, the remand home had 25 children (22 male and

3 female). Out of 25 children, only 10 had been given an advocate to represent them in court of which one of the 10 could remember the name of the advocate. 15 children who lacked legal representation are being supported by the University of Nairobi legal aid clinic through its alumni specialized in legal profession.

- Its legal aid clinic conducted training for children about the court proceedings through a mini-moot court and continues to advocate for the trial to be conducted in the language the children fully understand.
- Through its Psychology Faculty, the legal aid clinic was collaborating with students studying psychology in providing psychosocial support to the children at the remand and the rehabilitation schools. They also engaged the university sports team to organize sports events for the children.
- The university is providing support to the SGBV victims and creating awareness on the rights of these children. They developed training materials for the training of trainers. Plans are underway to develop videos that would be used to create awareness through social media with the aim of targeting the youth.
- It identified two secondary schools where they were to pilot law clubs as a strategy for crime prevention as well as use the clubs to create awareness on SGBV.
- It is also sensitizing the community on diversion through local media at the coastal region.
- It provided sanitary pads to the needy girls as part of its social corporate responsibility activities.

UNODC supports all steps to make the justice sector more child-friendly so that children who are in conflict with the law, or in contact with the law, are treated with sensitivity, respect and dignity.

- UNODC was able to extend its technical support to DCS through NCAJ with the agreement of the EU for the Programme on Legal Empowerment and Aid Delivery (PLEAD). Through PLEAD, 14 laptops were provided to DCS to ensure cases involving children could be heard by the court in a timely manner despite the COVID-19 pandemic. The Cabinet Secretary, Ministry of Labour and Social Protection, received the laptops plus 1,120 litres of hand sanitizer and 840 bars of soap from the European Union in Kenya during the last quarter of 2020. The laptops and hygiene products were earmarked for immediate use at the 14 Remand Homes managed by DCS. The main objective of the laptops was to ensure cases of children in remand homes are heard virtually and without delay which is sometimes caused by lack of transport to and from the Court, as highlighted in the Assessment Report. As a result, this will accelerate access to justice for both child victims and child offenders while ensuring child offenders are not held in custody for more than six months as stipulated in the Children's Act, 2001.
- In the Assessment Report, it was found that there exists a disconnect between the statutory maximum terms and practice contributing to the lack of well-designed and adequate rehabilitation programmes in the remand homes. Motivated by this finding, UNODC initiated a book donation drive whereby its personnel in Nairobi were encouraged to donate new or used books. The Head of Crime Prevention and Criminal Justice Programme presented the donated 170 reading books to the Director for DCS during the last quarter of 2020. A further consignment of donated books was delivered to Liberty Girls and St. Patrick's Boys Secondary school to support the learning of the students.

- Through its Regional Project on Crime Prevention and Criminal Justice, UNODC procured four laptops for the staff in the Institutions Division of DCS to enhance the efficacy in the delivery of their services as explained hereafter. The Juvenile Justice Agencies, which the Department of Children Services is part of, have been making efforts to fast-track the cases of several children in the remand homes through online court sessions. The Institutions Division within DCS routinely monitors the progress made in case management for children in the Remand Homes, utilization of bail and bond as well as diversion to comply with the constitutional requirement of ensuring children remain in confinement for the shortest time possible. The Department is an active member of the Through Care Committee where they have been participating in continuing series of virtual meetings and trainings on a number of child justice issues including development of tele-health handbook to guide delivery of psycho-social need of children in Statutory Institutions, training of manager of Statutory Children's Institutions (SCI) and the review of the Through Care Procedures. Further, the COVID-19 pandemic led to the new normal where meetings, trainings and court sessions are conducted virtually.

DCS Staff receiving the laptops

During the reporting period, the DCS undertook the following relevant partnership activities that contribute to the outcomes of this project:

- It held discussions with the Judiciary to link Judicial Information Management System (JIMS) to the Child Protection Information Management System (CPIMS). The CPIMS team participated in development of JIMS.
- It partnered with the US Embassy to conduct virtual training for all children's Officers in the country on bail and bond, plea bargaining, diversion and active case management.
- In Care Reforms involving children in residential institutions, DCS has developed formal partnerships with other state and non-state actors in transforming care and has developed case management for reintegration package to ensure effective reintegration of children, as well as family strengthening initiatives to empower families and communities to take in their children from institutions in order to reduce recidivism.
- It contributed to the development of the Children's Bill 2021 through multisectoral involvement which was approved by Cabinet and has been forwarded to the National Assembly to carry out its legislative role. Its first reading in parliament and public participation are among the major steps the Bill has made. There is need for National Council for Children's Services (NCCS) with support from key stakeholders to carry out advocacy activities to parliamentarians to enhance their understanding of the provisions of the bill with the aim of facilitating the Bill's passage in parliament.
- Through its membership in the NCAJ National Task Force on Children matters, DCS contributed to the development of Telehealth handbook (reference book in provision of Tele therapy) which is at the validation stage.

## 2. Reach

### Intermediaries and beneficiaries who have interacted with the project directly

Children from the following institutions have benefitted directly from the project: Dagoretti, Kabete, Kakamega, Kirigiti, Likoni and Wamumu Rehabilitation Schools; and Liberty Girls' and St. Patrick's Boys Secondary Schools.

From the six rehabilitation schools, 192 children are currently benefiting from the vocational training while 35 completed their trade tests. 23 children who exited rehabilitation schools are benefiting directly for the project partners through fees sponsorships. 133 Children have been reunified with their families while 109 including their respective parents and guardians are receiving counselling sessions aimed at identifying appropriate reintegration approach in the best interest of the child. 15 children at Likoni Remand Home received legal representation from the University of Nairobi alumni specialized in legal profession.

Parents or guardians also benefitted directly from the project such as the 26 parents who participated in the family group discussions and the 23 whose children are continuing with secondary education.

The Project also reached to partners such as Airtel, Fine Tech, Mirai Kenya, Individuals from the community, NCAJ and academic institutions.

***More information on the reach is provided in section one of this report.***

### 3. Changes to Theory of Change, the Logic Model and Performance Measurement Framework

#### Changes made to the Theory of Change, the Logic Model and the Performance Measurement Framework

There was no change.

#### Project Governance

The project management including planning, monitoring and reporting aspects was handled by the project team under the overall guidance of the UNODC ROEA Head of Crime Prevention and Criminal Justice Programme and the Secretary Children Services. The management of project finances were managed by UNODC.

In relation to planning, the project team held the following meetings through which challenges and solutions were identified:

- UNODC and DCS organized for the project's Kick-Off meeting held on 15 December 2020 aimed at ensuring each team member understands the objectives of the project, set implementation goals, establish a participatory and collaborative approach within the team, and build a good working relationship to ensure a more successful project for relevant stakeholders involved in the implementation as well as the beneficiaries.
- A meeting with the Cabinet Secretary for Labour and Social Protection was held on 28 January 2021 with the aim of officially briefing the Ministry's senior leadership on the expected results of the Phase 2 of the Project on "Preventing Violent Extremism through Rehabilitation, Vocational Training and Social Reintegration in children's statutory institutions in Kenya". The meeting was attended by UNODC Staff, a Representative from the High Commission of Canada in Kenya and the Ministry's relevant staff. The major outcome of this meeting was the official launch of phase 2 of the project.
- UNODC and DCS held a meeting on 30 March 2021 to discuss implementation progress of the planned activities. The discussions focussed on the validation and the launch of the Assessment Report and the Blueprint, procurement of the equipment for the vocational training workshops, status of the trainers in the beneficiary rehabilitation schools and UN administrative procedures.
- UNODC and DCS held a virtual meeting on 25 October to discuss the progress on the official handover of equipment and the launch of the vocational training as well as the implementation status of the other planned activities.

Courtesy call to the Cabinet Secretary

## 4. Lessons Learned and Actions taken, Recommendations and Next Steps

### Lessons Learnt

- The ultimate goal of rehabilitation is social reintegration. Family is a vital part of the rehabilitation, transition and reintegration of their own children back into the community. Being the smallest unit of the community, if this unit is functional then the community has a better chance of raising children that grow into law abiding adults and a more secure country. Thus, it is equally important to sensitize parents to bring them on board in rehabilitation efforts. That is why the project team is focussing on family group discussions and teleconferencing with parents.
- It is also recommendable to increase the number of openings for child learners to participate in co-curricular activities in rehabilitation schools. These activities are therapeutical to their mental development. Life skills sessions have attempted to incorporate some of these activities.
- Reconciliation is a part of the process of reintegration and this was exhibited by the parents and children who attended the family group discussions as well as the life skills trainings held in October and November 2021. Parents forgiving their children and vice versa seals the cracks in their relationships improving the mental health of both parties.
- Mainstream education has proved to be one of the most effective psychosocial support tools in the process of reintegration. Children exiting institutions often have a great desire to pick up where they left off in terms of education. The performance of both the boys and girls in St Patrick's Boys and Liberty Girls Secondary Schools, has shown steady improvement with the children competing on the same footing as those that have never been through the child justice system. They have proved that although they may have lost some time, they are up to the task just like any other child. The routine and structure provided by the school system has also helped to stabilize the children and provide a sense of identity, belonging and brother/sisterhood respectively, thereby improving their mental health. This has also proved the importance of bringing on board the boy child as an agent of change in promoting the rights of girl child.

### Challenges and corrective measures

- It has been difficult to get support for boys who wish to continue with their education because of the stigma the community has placed on them. However, through sustained negotiations with partners, Airtel Kenya agreed to support in clearing their school fees while Mirai Kenya committed to fully sponsor one boy who falls within their project geographical coverage.
- Girls have low interest in undertaking vocational training course that are associated with men. However, DCS is continuing to guide and counsel the girls and the project team hopes some of the girls would join some of these courses.
- Project schedule has faced disruption due to COVID-19 pandemic restrictions put in place by the government; reducing employee productivity due to sickness either directly or indirectly; stressed supply chains that caused equipment purchasing delays; and limited engagement with children to provide them with psychosocial support opportunities as part of their rehabilitation and reintegration. Nevertheless, the project team was constantly monitoring the project schedule and devising appropriate approaches to reduce the lengths of delays as well as communicate any identified delay to all stakeholders involved with the aim of consulting to reach a consensus on the best remedial approach.

## Recommendation

- After the successful launch of the two documents: Assessment of Rehabilitation and Social Reintegration Programs, Services and Practices for Children in Conflict with the Law in Kenya; and the Blueprint for Rehabilitation and Social Reintegration Programs, Services and Practices for Children in Conflict with the Law in Kenya, DCS recommends that the project management considers reallocation of some funds to cover for the dissemination and implementation of the recommendations contained in these documents to the field staff and partners such as county governments as well as conduct sensitization forums on the Blueprint for the government officers working with children. This is recommended noting that no budget was allocated in the project for dissemination of the two crucial publications.
- Reintegration of child and youthful offenders back to the community has for a long time been a challenge because of community stigmatization and ostracization as well as lack of economic empowerment. Based on the impact education has played on the children undergoing vocational training and those in secondary school for example, in changing behaviour and attitude, UNODC seeks to request for an increment to the budget allocated for the implementation of activities related to reintegration of the children existing rehabilitation schools as indicated in the concept note shared with Global Affairs Canada prior to this reporting.

## Gender Equality

- The project team has endeavoured to ensure gender equality is factored in all its activities. There has been equal opportunity provided to men, women boys and girls to participate in the project activities as provided for by the project statistics.

## Annexes to the Report

### Annex I – List of vocational training equipment

The annex provides details of each equipment delivered to each of the six target rehabilitation schools.

#### EQUIPMENT HAND OVER NOTE

**From:** UNODC Regional Office for Eastern Africa (UNODC – ROEA)

**To:** Directorate of Children Services

**Date:** 7 December 2021

**Subject:** Handover of Vocational Training Equipment to the Department of Children Services

UNODC ROEA Crime Prevention and Criminal Justice Programme officially handed over the vocational training equipment for the workshops listed herein to the Department of Children Services on 10 November 2021. The equipment was purchased within the framework of the project on Preventing Violent Extremism through Rehabilitation, Vocational Training and Social Reintegration in children's statutory institutions in Kenya (Phase 2) funded by the Global Affairs Canada. The equipment is to support vocational training in the children statutory institutions with the aim of enhancing young offenders' knowledge and hands-on-skills to give them a fair chance of prospering in life which is an economic empowerment for the young ones and ultimately contributing to the efforts by the Government of Kenya to reduce recidivism and violent extremism.

	Vocational Training Workshop	Benefiting Rehabilitation Schools	Name of equipment purchased and specifications
1.	Masonry	Kabete, Likoni, Wamumu and Kakamega for boys	For more details, attached is a list of equipment for each institution.
2.	Carpentry	Kabete, Likoni, Wamumu and Kakamega for boys	
3.	Tailoring and Dressmaking	Kabete, Likoni, Wamumu and Kakamega for boys	
4.	Bakery and Confectionery	Kabete, Likoni, Wamumu and Kakamega for boys; and Dagoreti for girls	
5.	Electrical and Wiring	Kabete, Likoni, Wamumu and Kakamega for boys	
6.	Poultry	Kabete, Likoni, Wamumu and Kakamega for boys; and Dagoreti and Kirigiti for girls	
7.	Automotive	Kabete	

*\*Kabete workshops for masonry, carpentry, electrical and wiring, and Automotive will also support girls from Dagoretti and Kirigiti who will be interested in these trainings.*

**UNODC**

United Nations Office on Drugs and Crime

The delivery of the mentioned equipment falls under **Activity 4** of this Project: Equip children in the selected rehabilitation schools with vocational skills through provision of equipment to vocational units, creation of strategic partnership with private sector and the government.

The equipment shall be solely used for official purpose within the framework of the mentioned project. Any use of the equipment that is not in accordance with the above-mentioned scope can only be possible with the formal agreement of the UNODC ROEA.

This equipment handover is duly authorized and accepted by both UNODC ROEA and the Beneficiary, in this case the Directorate of Children Services. The Directorate of Children Services therefore assumed full custody from the day of the official handover of equipment and launch of the vocational training programme that took place on 10 November 2021.

## Annex III: Communications

Organization	Publication Title	Description	Project Support Provided	Release/Follow Up
UNODC Regional Office for Eastern Africa	<p>Web Story published on 29 January 2021</p> <p><a href="https://www.unodc.org/easternafrika/en/Stories/new-project-phase-to-prevent-violent-extremism.html">https://www.unodc.org/easternafrika/en/Stories/new-project-phase-to-prevent-violent-extremism.html</a></p>	New phase of project to prevent violent extremism among children in conflict with the law begins in Kenya	No funds incurred	For public awareness raising.
Directorate of Children Services	<p>Assessment of Rehabilitation and Social Reintegration Programmes, Services and Practices for Children in Conflict with the Law in Kenya.</p> <p>© Department of Children's Services, January 2021</p> <p><a href="https://www.socialprotection.go.ke/wp-content/uploads/2021/04/DCS_Assessment-of-Rehabilitation-and-Reintegration-Programmes_HR.pdf">https://www.socialprotection.go.ke/wp-content/uploads/2021/04/DCS_Assessment-of-Rehabilitation-and-Reintegration-Programmes_HR.pdf</a></p> <p><a href="http://www.socialprotection.go.ke">www.socialprotection.go.ke</a></p>	The Assessment Report provides findings and recommendation on rehabilitation and reintegration programmes for children in conflict with the law aimed at informing DCS strategic planning and enhance the effectiveness of the programmes offered by DCS and other stakeholders.	Phase I of the project funds contributed to the research and technical drafting of the assessment report while Phase II i.e. this project funds supported the publishing costs.	<p>The Assessment Report was officially launched on 28 April 2021 by the Cabinet Secretary for the Ministry of Labour and Social Protection in a virtual event</p> <p>The findings and recommendation of this report informed the development of the proposal for Phase II of this project. University of Nairobi used the findings on legal aid to mobilize resources for their project on legal aid in which it is partnering with DCS. Japan International Cooperation Agency (JICA) is using the report to inform the development of its programme on child justice in Kenya</p>

UNODC Regional Office for Eastern Africa	Web Story published on 30 November 2021 <a href="https://www.unodc.org/easternafrika/en/Stories/children-in-rehabilitation-schools-and-parents-get-trained-on-life-skills-and-coping-mechanisms.html">https://www.unodc.org/easternafrika/en/Stories/children-in-rehabilitation-schools-and-parents-get-trained-on-life-skills-and-coping-mechanisms.html</a>	Children in rehabilitation schools and parents get trained on life skills and coping mechanisms	Project funds were incurred in conducting the training for the children in Kabete and Kirigiti Rehabilitation Schools and parents of these children.	To highlight the achievements of the project.

## Annex IV: Outcome Reporting Worksheet

<b>Project Title</b>	Preventing Violence Extremism through Rehabilitation, Vocational Training and Social Reintegration in children's statutory institutions in Kenya	<b>Project No.</b>	CTCBP-P009559	<b>Implementing Organization</b>	UNODC Regional Office for Eastern Africa (ROEA)
<b>Country/Region/Institution</b>	Kenya/Directorate of Children Services	<b>Budget</b>		<b>Project Duration</b>	4 December 2020 to 31 March 2024

Indicators	Baseline	Target	Actual Data Previous Reporting Period	Actual Data This Reporting Period (year)	Actual Data Cumulative	Analysis of Progress/Variance
Ultimate Outcome 1000: Reduced recidivism and radicalization to violent extremism hence improved safety and security						
Reduced rate of recidivism among Children and Youth		National	0	Based on Economic Survey, 2021 conducted by the Kenya National Bureau of Statistics, the total number of crimes reported declined by 25.4 per cent from 93,411 in 2019 to 69,645 in 2020	Crimes reported declined by 25.4 per cent from 93,411 in 2019 to 69,645 in 2020	There is a decline in crimes based on police reporting.
Intermediate Outcome 1100: Successful rehabilitation and reintegration of youth and women ex-offenders through a holistic approach, and a comprehensive follow up mechanism after exit with the aim of reducing recidivism and violent extremism among youth and children.						
Number of ex-offenders successfully rehabilitated and reintegrated through this project.	6 girls rehabilitated back to the community through primary and secondary education	15 Offenders	0	150 children (109 boys and 41 girls)	150 children	There is no variance because the target set for the project was to have 15 children rehabilitated. The target is already surpassed.

Indicators	Baseline	Target	Actual Data Previous Reporting Period	Actual Data This Reporting Period (year)	Actual Data Cumulative	Analysis of Progress/ Variance
<p>Immediate Outcome 1110: Capacity of child/young offenders and women offenders' life skills, vocational training, entrepreneurship skills, financial literacy, and emotional well-being enhanced.</p>						
Number of offenders trained on vocational skills and life skills	40 girls trained on life skills	120 including girls and boys	0 0 0	<p>36 children (11 boys and 25 girls) were trained on life skills</p> <p>35 children (34 male and 1 female) completed their trade tests following their vocational training.</p> <p>26 (9 male and 17 female) parents/guardians benefited from counselling sessions through family group discussions</p>	<p>36 on life skills</p> <p>35 with vocational training certificates</p> <p>26 parents benefited from counselling sessions offered through family group discussions</p>	<p>The target set for the project is 120 children to be trained in vocational and life skills. There is a variance of 49 children which will be met by the end of next year.</p> <p>There was no target set for this.</p>
Number of equipment provided, and offenders trained using the purchased equipment	<p>4 sewing machines purchased for and delivered to Dagoretti and Kirigiti Rehabilitation Schools; and baking machine purchased for and delivered to Langata Women's Maximum Prison</p> <p>13 girls enrolled in tailoring and dressmaking</p>	Equipping the vocational training workshops within these rehabilitation schools	<p>Issued Purchase orders for delivery of equipment for electrical and wiring; tailoring and dressmaking; masonry; carpentry; poultry; bakery and confectionery; and automotive</p> <p>0</p>	<p>6 vocational training workshops in each of the following rehabilitation schools: Kabete, Likoni, Kakamega and Wamumu provided with equipment. Noting that Electrical and Wiring, Masonry, Carpentry and Automotive will also serve Dagoretti and Kirigiti girls rehabilitation schools. (see Annex I)</p> <p>192 Children have enrolled in different vocational training courses within these rehabilitation schools</p>	<p>27 vocational workshops provided with equipment.</p> <p>192 children currently benefitting from the training</p>	<p>There is no variance, and progress is being made on the component of vocational training.</p>

Indicators	Baseline	Target	Actual Data Previous Reporting Period	Actual Data This Reporting Period (year)	Actual Data Cumulative	Analysis of Progress/ Variance
Immediate Outcome 1120: Ex- rehabilitation schools' offenders having access to education and employment through established education outreach programs and strategic partnership for opportunities from private sector.						
Number of ex-offenders linked to education and employment opportunities through established partners	6 girls linked to primary and secondary education	15 offenders	0	23 children, 13 boys and 10 girls	23 children	There is no variance because the target set for the project was to have 15 children rehabilitated. The target is surpassed by 8 children.
Number children unified with family members or in other permanent care arrangements	0	15 Offenders	0	36 (14 boys and 22 girls) children were successfully reunified by parents or guardians through continuous counselling for children and parents or guardians	36 children	There is no variance because the target set for the project was to have 15 children rehabilitated. The target is surpassed by 21 children. The 36 children include those still in rehabilitation schools and those transitioned in secondary schools.
Number of empowerment toolkits provided through this project.	0	0	0	0	0	The empowerment tools have not been purchased because funding is yet to be received.
Intermediate Outcome 1200: Improved application of international instruments that relate to the rights of children, youth and offenders by practitioners in juvenile justice and staff in Children's Statutory Institutions.						
Number of staff who have applied new skills related to the training on international legal framework/instruments related to the rights of children, youth and offenders in their daily work	0	330 Staff in the Children's Statutory institutions	0	0	0	This is because: (a) the development of the training curriculum and manual on preventing violent extremism is still at its initial stages of development; and (b) the development of modules on the Child Protection Information Management Systems (CPIMS) to be applied in training the staff is yet to start.

Indicators	Baseline	Target	Actual Data Previous Reporting Period	Actual Data This Reporting Period (year)	Actual Data Cumulative	Analysis of Progress/ Variance
<p>Immediate Outcome 1210: Increased knowledge and skills of staff from Children's Statutory Institutions in implementing international legal framework/instruments relating to the rights of the child, youth and in general, offenders; and in handling violent extremism cases as well as children with special needs.</p>						
Increased number of staff with an understanding of international legal framework / instruments relating to the rights of the child, youth and in general, prisoners; and in handling violent extremism cases	Limited number of staff have an understanding of international legal framework / instruments relating to the rights of the child, youth and in general, prisoners; and in handling violent extremism cases	330 Staff in the Children's Statutory Institutions	0	0	0	This is because the development of the training curriculum and manual on preventing violent extremism is still at its initial stages of development.
Number of equipment purchased	No electronic data records managed from the selected institutions.	Purchase of six computers for data recording	0	6 desktops, 6 monitors and 6 laptops have been procured for each of the six rehabilitation schools.	6 desktops, 6 monitors and 6 laptops	However, UNODC will officially handover the equipment to DCS in January 2022
<p>Intermediate Outcome 1300: Improved coordination between government and the community in handling cases related to violent extremism, and rehabilitation and reintegration of offenders.</p>						
Number of coordination meeting and consultations held between partners	2 meetings supported by UNODC for Juvenile Justice Agencies	Quarterly	0	7 coordination meetings held with various child justice agencies.	7 coordination meetings held with various child justice agencies.	There is no variance.
<p>Immediate Outcome 1310: Established partnerships between government and the community in handling violent extremism cases; and in rehabilitation and reintegration of young offenders and children in conflict with the law</p>						
Number of operational partnerships established	Baseline: 3 operational partnerships	4 operational partnerships	3 (National Council on Administration of Justice, One Secondary School and One primary School)	5 (Liberty Girls and St. Patrick's Boys Secondary Schools, University of Nairobi, Airtel Kenya, Fine Tech and Mirai Kenya)	7 (National Council on Administration of Justice, Liberty Girls and St. Patrick's Boys Secondary Schools, University of Nairobi, Airtel Kenya, Fine Tech and Mirai Kenya)	There is no variance.
