

# Policy & Treatment Environments OUTCOMES for UN

- To issue a position statement and disseminate.
- Issue and provide technical support to establish minimum standards and entry criteria for voluntary evidence-based drug dependent treatment options.
- Document good practice models e.g. Malaysia phase-out

# Policy & Treatment Environments OUTCOMES for the Community

- Know your rights, **stop blaming yourself.**
- Be involved in the programmatic response.

# Policy & Treatment Environments

## OUTCOMES for Civil Society

- Advocate, at a country level, for voluntary evidence/human rights-based drug dependence treatment options.

**For organizations specializing in human rights.**

- Provide training in both human and civil rights for the community.
- Provide channels for voicing concerns to specialized respective bodies.

# Policy & Treatment Environments OUTCOMES for Parliamentarians

- Remove barriers to discriminatory and stigmatizing policy and legislation for people who use drugs.
- Adopt UN minimum standards and entry criteria.
- Advocate for drug dependence as a chronic relapsing health condition.

# Policy & Treatment Environments OUTCOMES for Parliamentarians

- Manage voluntary evidence-based drug dependence treatment under the health sector.
- Commit national budget for sustainable and voluntary, evidence-based drug dependence treatment options involving all stakeholders

# Policy & Treatment Environments OUTCOMES for national governments

- Provide strategic and sustainable planning and costing for voluntary, evidence-based drug dependence treatment options.

# Policy & Treatment Environments

## OUTCOMES for Donors

- Avoid supporting non evidence-based drug treatment (except for humanitarian reasons).
- Support voluntary evidence-based drug dependence treatment options through a collaborative strategic planning process with national governments
