

Seizures of ATS (excluding "ecstasy"-type substances), 2014

Weight in ton equivalents*.

The present map includes data from countries and territories for which official seizure data are available and amount to more than 10 kg.

Source: UNODC annual report questionnaire data, supplemented by other official sources.

Note: The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

Dashed lines represent undetermined boundaries. Dotted line represents approximately the Line of Control in Jammu and Kashmir agreed upon by India and Pakistan. The final status of Jammu and Kashmir has not yet been agreed upon by the parties.

The final boundary between the Sudan and South Sudan has not yet been determined.

A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (Malvinas).

* This quantity reflects the bulk weight of seizures of amphetamine-type stimulants (excluding "ecstasy"-type substances) (amphetamine, methamphetamine, non-specified ATS, prescription stimulants and other stimulants), with no adjustment for purity. Seizures of amphetamine, methamphetamine and non-specified ATS reported in tablets or similar units are converted using assumed bulk tablet weights between 90mg and 300mg, depending on the region and specific drug type and based on information currently available to UNODC. The conversion factors are listed in the methodology section of the World Drug Report. Seizures reported by volume are converted assuming 1 litre has a mass of 1 kg.
